

I listen to K-LOVE radio (fm 105.9, 99.1, or 88.3) all the time. I have all three of those numbers plugged into my car radio buttons. Also, when I travel in the US, I try to find them on the radio on other channels. I have donated money to them to help keep them on the air because I highly value them. They are a nonprofit service to people looking for a Christian music alternative on the air waves, and do a wonderful job of providing great contemporary Christian music and encouragement 24 hrs a day. There is only one other station in my area (it is a local station) that provides this type of music most of the day, but it is filled with a lot of talk especially in the mornings when I like to hear music while driving to work, and filled with LOTS of commercials. K-LOVE provides the music without the commercials and with relatively little talk. I would be very very unhappy to have K-LOVE taken away, which I understand could happen due to being displaced by an LPFM (low power FM) broadcaster. I believe the service provided by K-LOVE is in the public interest because it gives an uplifting, encouraging alternative to the other music heard on the airwaves. Many people have commented as to how K-LOVE has helped them in difficult times or just given them more joy in their daily lives. It is safe, positive music for children to listen to as well, and children love it. They promote Christian artists and play their new songs and let us know when there is a concert in our area. Safe, upbeat lyrics promoting love, peace, faith, and encouragement are surely a service to many. PLEASE do not allow an LPFM to replace (or take priority over) the FM translator service and leave us without our K-LOVE signal.
